

Snap-in DevelopmentChallenge

Step1 : Utilizing the DevRev API

- 1.obtained the PAT access token from the devrev
- 2.using that PAT the api access key is obtained
3. Using the api key json data related to the object is obtained and it is shown in fig

4. After this used the python language to post the object but i am getting the connection error and the python used is attached in below fig

```
import requests

# API endpoint for creating work items
create_work_item_url = "https://api.devrev.com/work.create"

# Your API key
api_key = "eyJhbGciOiJSUzI1NiIsImRlczyIGlmh0dHBzoi8vYXV0aC10b2t1bi5kZXZyZXVwYWkiWiwia2lkIjoic3RlZXtpZF9yc2EilCj0eXAiOiJKV1QiIQ.eyJhdWQiOiJsiamFudXMxSWiyXpwIjoizG9uOmlkZW56"
